

## MR-1000 System Update Ver.1.5.0 Release Information

Note: If the system of your MR-1000 is already "Ver.1.5.0", you do not need this update.

How to check the system version of your MR-1000

During power up, the screen displays the system version number.

Ex. The system version is "Ver1.5.0".

### Ver.1.5.0

- MP3 file playback added. (Sampling frequency 44.1kHz or 48kHz / Bit rate 32, 40, 48, 56, 64, 80, 96, 112, 128, 160, 192, 224, 256, 320kbps)
- During playback and stop, pressing P dial jumps the unit to the current folder or play list. You can select files quickly with this. You can move to any directory inside the library during playback.
- Alphabet sort display added to the library display.
- In the library selection screen, long file names can be displayed in scroll.
- Quick play function for starting playback instantaneously.
- Mark jump function added.
- 2sec is added as the backlight lighting time option to reduce the battery consumption.
- "∞" added to meter peak hold setting. (<- If you see "∞" as funny characters, it is meaning a infinite mark.)
- After being in "REC PAUSE" for a while, the MR sometimes displayed "Disk Too Busy" during recording. This has been fixed.
- The processor system has been refined to overall minimize the message "Disk Too Busy".
- A few low-level bugs are fixed.
